What was done well?

- I think I was able to lay out tasks that encompassed some part of the website that would be accessed the most.

- Classmates were quick to finish evaluations.

What went bad?

- No considerations for mobile user's interactions with site, I'm not even sure if it is compatible for mobile users.

- Nothing else

What was learned?

- Something that may seem easy to me, may be difficult for the average user.
- Don't miss class.
